

ABSTRACT OF THE DISCLOSURE

A specimen centrifuge apparatus comprises a specimen container carry-in system and a specimen container carry-out system. The specimen container carry-in system has a specimen container carry-in conveyor for loading pre-processed specimen containers into specimen centrifuge units stacked one on another in a centrifuge device, a carry-in elevator, a carry-in transfer arm, and a loading arm. The specimen container carry-out system has a specimen container carry-out conveyor for unloading the processed specimen containers from the specimen centrifuges, a carry-out elevator, a carry-out transfer arm, and an unloading arm.
